Microlite 20 Purest Essence – Zine Edition

Microlite 20 PE by Robin V. Stacey, Darrell King & Al Krombach

This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play.

The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

CHARACTERS

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats. Stat bonus = (STAT-10)/2, round down.

Races

- **Humans** get +1 to all skill rolls
- **Elves** get +2 MIND
- **Dwarves** get +2 STR
- **Halflings** get +2 DEX

Classes

- **Fighters**: Wear any kind of armor and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.
- **Rogue**: Can use light armor. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack.
- **Magi**: Wear no armor. They can cast arcane spells, and gain a +3 bonus to Knowledge.
- **Clerics**: Can wear light or medium armor. They cast divine spells and gain +3 bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed. (Very easy: 5, Easy: 10, Medium: 15, Hard: 20, Very hard: 25, Nearly impossible 30).

Skill rank = your level + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind costs Hit Points. The cost is: 1 + double the level of the spell being cast. (Think of it as fatigue damage).

This loss cannot be healed normally but is recovered after 8 hours rest. *There is no need to memorize spells in advance.*

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells: 10 + Caster Level + Caster's MIND bonus

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

- Melee attack bonus = STR bonus + Level
- Missile attack bonus = DEX bonus + Level
- Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add STR bonus to Melee damage, x2 for 2-handed weapons. Armor Class (AC) = 10 + DEX bonus + Armor bonus.

Note: A touch attack is against the targets AC without their armor bonus. A flat-footed attack is against the targets AC without their DEX bonus.

LEVEL ADVANCEMENT

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3. etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds: 1d6 to Hit Points, 1 to all attack rolls, and 1 to all skills.

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND.

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Rogues gain +1 to their imitative rolls at levels 5, 10, 15, ect.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

WHEN IN DOUBT . . . REMEMBER
Whenever the players want to try something that goes around, through, or above and beyond the rules as written, you can always use the "GM's Friend"...the 50% chance. Have them roll whatever check seems most appropriate. A roll of 1-10 is a failure, a roll of 11-20 is a success. If you feel that the situation warrants that you favor them, assign a +2 bonus to their roll. If the situation determines that they be hindered, then assign a -2 penalty.

and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

EQUIPMENT LIST

Starting Wealth
The most common coin is the gold piece (gp). A gold piece is worth 10 silver pieces. Each silver piece is worth 10 copper pieces (cp). In addition to copper, silver, and gold coins there are also platinum pieces (pp), which are each worth 10 gp.

You begin with a certain amount of acquired wealth, determined by your character class.

- Fighter 150 gp
- Rogue 125 gp
- Mage 75 gp
- Cleric 120 gp

The character uses this accumulated wealth to purchase his initial weapons, armor, and adventuring equipment, using the price lists on the tables below.

Weapons
Here is the format for weapon entries (given as column headings on the table below).

Cost: This value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.

Damage: The damage column gives the damage dealt by the weapon on a successful hit.

Range Increment (if any): Any attack at less than this distance is not penalized for range. However, each full range increment imposes a cumulative -2 penalty on the attack roll. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot out to ten range increments.

ADVENTURING EQUIPMENT
Back in the day, there were standard equipment packages, pre-compiled and pre-calculated, to help new players get started quickly. This document is inspired by those lists and provides a way for a player to quickly equip his or her PC or a GM to equip an NPC or Hireling on the fly. Additionally, these optional kits can be used to give a starting point from which to customize new characters.

Traps
Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying Encounter Levels are summarized below.

The entries for traps include the following information:

- Type of trap: Attack (damage), Save DC, Search DC, Disable DC.
- Type lists the trap used and the effect it has.
- Attack shows the traps attack bonus or type of effect.
- Damage shows the amount and type of damage the trap deals.
- Save DC lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only 1⁄2 the listed damage (if this is possible).
- Search DC lists the DC for the know+MIND check necessary to find the trap without triggering it.
- Disable DC lists the DC for the sub+DEX check necessary to disarm the trap safely.

EL1 Traps
- Basic Arrow Trap: Atk +10 (1d6, arrow); Search know+MIND DC 20, Disable sub+DEX DC 20.
- Camouflaged Pit Trap: 10 ft. deep (1d6, fall); Save DC 15 to avoid; Search DC 24, Disable DC 20.

- Incubation lists the time before damage begins.
- Damage lists the ability damage the character takes after incubation and each day afterward.

Extreme Heat & Cold
If not wearing suitable protection, a character must make a Phys+STR check once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Falling Damage
A falling character takes 1d6 hp of damage per 10 feet fallen. If the character makes a successful Phys+DEX roll, he takes only half damage. The DC for the phys+DEX roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1 hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

Poison
Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way.

Several typical poisons are summarized below. The entries for poisons include the following information: *Name of the poison: Type, DC, damage, prrice.*

- Type lists the poison's method of delivery (contact, ingested, inhaled, or injury).
- DC lists the phys+STR check DC needed to avoid the poison's damage.
- Damage is expressed as "xdx/xdx." The first number is the initial damage, taken immediately upon failing the phys+STR check against the poison. The second number is the secondary damage, taken one minute after exposure to the poison if a second phys+STR check is failed. Ability damage is temporary unless marked with an asterisk(*), in which case the loss is permanent. Unconsciousness lasts 1d3 hours.
- Price lists the cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources, as the possession of poisons are commonly illegal.

endless array of "Feats" available in the SRD, this can sometimes decrease Microlite20's intended compatibility with some d20 adventures, with respects to power level. Heroism is intended to relieve some of that disparity.

Heroism is a bonus equal to the character's level, and may be applied 3 + (plasyer level / 2, rounded down) times per day to any of the following:

• Attack Bonus	• Saving Throw	• AC
• Damage	• Skill Check	• Spell DC

Magic
Here are three ways for spell casters to add a little more variety to their repertoire. Each modifies a spell in a given way, and each doubles the casting time of the spell so modified (most spells become full round actions instead of standard actions, for example). Also, each requires an additional expenditure of hit points, added to the standard cost of the spell at the time it is cast.

- Extending: Makes a spell last twice as long as it normally would. An Extended spell costs an additional 2hp.
- Empowering: Makes a spell do 50% more damage than it normally would. An Empowered spell costs an additional 4hp.
- Widening: Makes a spell's area of effect twice as big as it would normally be. A Widened spell costs an additional 6hp.

EXPERT RULES

This rule-set allows for introducing a few more options to your Microlite20 game, without necessarily increasing its complexity. Included are: a new skill, new races, new classes, and some other (hopefully) good stuff. It is not necessary to use Microlite20 Expert Rules in its entirety; DMs are encouraged to "cherry pick" those specific items applicable to their own campaign.

Races
- Gnomes get +1 to DEX, +1 to MIND
- Half-orcs get +4 to STR, -2 to MIND
- Half-elves get +1 to DEX, and +1 to any 2 Skills
- Lizardmen get +2 to STR, +2 to Dex, -2 to MIND

Classes
- **Paladins**: Wear any kind of armor and use shields. They have a +1 bonus to Physical and a +2 bonus to Communication. They are immune to diseases and apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on). Paladins can detect evil within 60' at will and can heal up to 2hp per level per day by laying on hands. A character must be of Lawful Good alignment to be a Paladin.
- **Rangers**: Can use light or medium armor and can use shields. They are +1 to hit and damage with ranged weapons and only incur a -1 to hit penalty when fighting with 2 weapons. They have a +3 bonus to Survival.
- **Illusionists**: Wear no armor. They can cast Illusionist spells and gain a +2 bonus to Communication and a +1 bonus to Subterfuge. Characters must have a minimum DEX score of 13 to be Illusionists.
- **Druids**: Wear any non-metal armor or shield. They cast Druid spells and gain +2 to Knowledge and +2 to Survival. Druids are immune to the spell-like effects of woodland fey. At 3rd level a Druid can pass without trace at will. At 5th level a Druid can assume the form of any small or medium sized animal up to 1 time per day for every level past 4th. A Druid heals 2hp per level when changing back into his human form.
- **Bards**: Wear light armor and can use bucklers. They gain a +2 bonus to Communication, Subterfuge, and Knowledge. A Bard can counter sound-based effects within a 30' radius. A Bard can use his song to charm person or remove fear up to 3 times (total) per day. Beginning at 6th level, a Bard casts spells as either a Druid or Illusionist (player's choice) of 5 levels lower.

Skills
Microlite20 Expert Rules adds a new, 5th skill: Survival. Survival is used for things like tracking, foraging, setting or spotting snares, hunting, finding water or rare herbs, determining direction, and the like. Only Rangers and Druids are specialized with this skill.

MONSTERS

Skills
All creatures have a bonus to all skills equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open -- if you need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement
To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses.
For each doubling of the Hit Dice, increase the dice size for attacks (ie, d4->d6, d6->d8, etc). Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create Your Own
Assign Hit Dice (d8 for most things, d12 for Dragons and Undead).
Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.
